

CREATING THE FUTURE

2

FOUNDED BY VISIONARIES

CREATING THE FUTURE.

Early in 2005, AMR recognized the opportunity ahead by becoming the industry leading patient-centric portal solutions provider. Then it was known as a Personal Health Records (PHR) and we were doing it before it was 'cool'. We continue to remain ahead of the curve.

THE AMR ADVANTAGE:

- *Merging and Sharing Multi-Source Data*
- *Seamless Integration for all EHR's/EMR's*
- *One Portal, One Password, One Patient*
- *For All Records*

AMR continues to be an early innovator in Health Information Technology (HIT) consistently breaking the data barriers of today's challenges. AMR delivers innovative and engaging portal solutions that meet and exceed the real-life needs, desires, and mandates of today and well into the future. We are the SaaS portal solution provider you want as your partner.

CREATING THE FUTURE

“Based on proven technology and certified solutions, AMR offers a unique combination of innovation and common sense to the digital age healthcare professionals, consumers and EHR/EMRs, by providing single portal access to all patient records –and true interoperability.”

7 REASONS PARTNERING WITH AMR IS THE RIGHT DECISION.

NOW AND INTO THE FUTURE.

Proven Patient Expertise & Partnership.

Our portal solutions provide EHR/EMR partners with true interoperability and an intuitive patient-centric interface that's inviting and easy-to-use for everyone. Single point access to all medical records and bi-directional information flow between multiple doctors and patient are all part of the AMR partner experience.

Our World-Class Development Team.

AMR Partners enjoy exclusive access and joint-development and integration opportunities with our world-class development and support teams.

Partner's Resources Stay Focused.

Your time and budget remain focused on the development and evolution of your business, leave the Patient Portal solution and customer-facing support to AMR.

Your Development Savings.

Our partners don't need to build a compliant patient portal and patient engagement solution, nor do they need to incur the financial and resource-heavy burdens. AMR's Certified solution will facilitate the mandated requirements for your customers and their patients.

Meaningful Use Compliance - Integrated

We simplify our partner's Patient Portal compliance and usability challenges with our 2014 MU-2 Certified patient portal and engagement solutions. Integration is accomplished through the AMR Web Services.

**AMR Revenue Model.**

Our Partners get a revenue-advantage in the market with AMR's unique revenue stream opportunities.

Time To Market & Competitive Advantage.

AMR's Web Services facilitate quick integration to your existing platform, as opposed to building a solution of your own. This provides an additional advantage with the ability to instantly offer a 2014 MU-2 certified portal to your customers—keeping patients engaged with the one portal they'll actually use.

INNOVATION AND PORTAL DESIGN IT'S ON EVERY C LEVEL EXECUTIVE'S MIND

Your Future through Integration.

The AMR Solution is Simple - Integrate, don't create.

- Our years of experience in the real-world practices and behaviors of patients.
- We know what patients want; not just what they're told they can have.
- We understand the needs of the EHR/EMR providers and the compliance and usability challenges they face.
- A revenue opportunity to all EHR/EMRs through our proprietary software solutions.
- Our software design allows patients the sharability of a what portal is meant to be.

AMR sees the future of the Portal as the pivot point between the doctors and their patients.

AMR sees beyond the fundamentals of meaningful use and gives the patients what they truly need to manage and share all their records, being truly engaged.

AMR portal integration gives the EHR customer an advantage in providing better patient engagement today and tomorrow.

AMR proprietary solution takes away the burden of compliance and costs-to-build while creating a new revenue stream for your company.

AMR Patient Portal Delivers.

*Connected Care Documentation,
Patient Engagement, and Patient Support.*

A revenue-share opportunity for partners.

The future in patient portals, today.

*Eliminates the data-barriers of legacy systems.
Compliant. Convenient. Accessible. Affordable.*
